This textbook deals with heat transfer and fluid flow in the elbow and is a basic textbook for CFD beginners. Heat transfer and flow are probably some of the most important, in my opinion, and at the same time the most difficult sections in mechanics. If you know about heat transfer and fluid motion, then you can understand many sections concerning mechanics, such as solid mechanics, gas mechanics, etc. If you are not familiar with heat transfer and fluid motion, then you will find it very difficult to understand many sections and sections such as fluid and gas dynamics.
